## **1. Introduction**

iEdit is online image editing tool which help user to edit their images online without downloading and installing any application to their device.

### **1.1 Abstract**

iEdit is online image editing tool which help user to edit their images online without downloading and installing any application to their device.

iEdit gives user freedom to save their images on server otherwise just "Edit and Download" images.

iEdit provide following features.

- **Crop/Resize:** Crop and resize your photos easily without any loading time.
- **Apply Effects on Image:** Glorify image by applying different effects on image like changing seturation, greyscale, blur etc...
- **Cliparts:** You can add interesting clipart from our clipart gallery where you can find lot of freely available clipart.
- **Adding Frames**
- **Adding Text**

### **1.2 Scope & Objective**

#### **Scope:**

Scope of this project is for users who want to edit their photos quickly and easily without installing any kind of software to their device.

#### **Objective:**

1. Provide User Convienet and easy way to edit their photos.
2. Allow user to devorate their images with cool Cliparts and frames.
3. Allow user to add text to their photos.
4. Provide Web based solution for editing photos.
5. Store photos edited by user's on server for further use.

## **2.Requirement Analysis**

### **2.1 Requirement Gathering.**

Following Requirements are gathered for Online image editing tool “iEdit”.

1. System should allow user to upload their photo and then edit them.
2. It Should support all popular image formats like jpg,png,bmp etc.
3. It should provide lightweight interface to user so it can save time of user.
4. Website should work with most of web browsers.
5. User should be allowed to do following tasks.
  - a. Crop/Resize
  - b. Apply Effects on Image
  - c. Cliparts
  - d. Adding Frames
  - e. Adding Text
6. User should be able to save their photos on server for further use.
7. User should have security and privacy for their uploaded photos.

### **2.2 Requirement Analysis.**

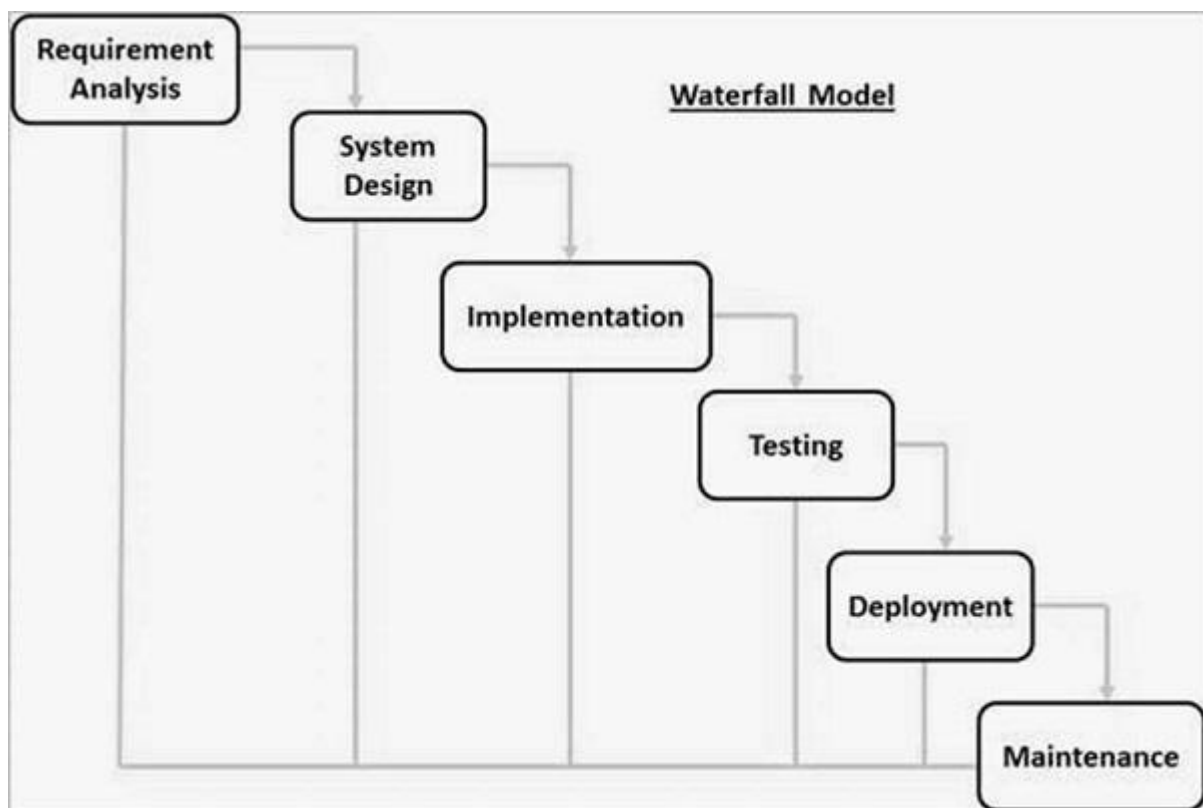

After Analyzing requirements gathered above We can satisfy all of above requirements.

## 2.3 Software Model.

As we have all requirements ready with us and there is no much risk in system so we will follow waterfall model for project development.

Waterfall model consists of 5/6 simple stages which are follow. where 2st stage is completed which is requirement analysis.

## 2.4 Technology Details.

<b>Project Title</b>	iEdit(Online Image Editing Tool)
<b>Project Objective</b>	Allow user to edit their photos online on web based editor.
<b>Name Of College</b>	SDJ International College
<b>Front-End Tool</b>	JavaScript,SVG,HTML
<b>Back-End Tool</b>	PHP with MySql Database
<b>Operating System</b>	Any Operating System with latest Browser Support. eg. Chrome, Firefox
<b>Internal Guide</b>	Nehal Patel
<b>Submitted By</b>	Pandey Aadarsh H.

## **3. Designing**

### **3.1 Database Design**

#### **Users**

<b>Column Name</b>	<b>Data Type</b>	<b>Description</b>	<b>Constraints</b>
Id	Number	Unique ID of Users	Primary Key
Name	Text	Full Name of User	-
Username	Text	Unique Username for all users	-
Email	Text	Email of User	-
Password	Text	Password for user Login	-

#### **Assets**

<b>Column Name</b>	<b>Data Type</b>	<b>Description</b>	<b>Constraints</b>
Id	Number	Unique ID of Asset	Primary Key
Name	Text	Name of Asset	-
Type	Text	Asset type (clipart/frame)	-

### User Photos

Column Name	Data Type	Description	Constraints
Id	Number	Unique ID of Photo	Primary Key
Name	Text	Name of Photos Provided by user	-
User_id	Number	Reference to User's id who created photo	Foreign Key
Status	Text	Status of Photo. Active or not	-
Path	Text	Path where photo is saved	-

## 3.2 User Interface

### Client Side Interfaces

## iEdit Online Image Tool

### Main Editor(iedtor.php)

This is Main Editor which is called iEditor. It is core of iEdit website. It provides various function to users. Like user can upload their photo here and then he/she can add text,clipart,frame of resize and crop their photos. After doing this all things user can download their photo from here also.

## iEdit Online Image Tool

```
<?php
require_once "header.php";
